HLTAID001 Perform Cardiopulmonary Resuscitation

Unit being delivered

In day to day life, in the workplace, in the community or at home, you may be confronted by a life-threatening emergency such as someone experiencing Cardiac Arrest. Quick decision making and knowledge on what to do could save someone's life.

This course provides you with the skills and knowledge to recognise when someone is unconscious and not breathing normally (Cardiac Arrest) and increase their chance of survival by calling an ambulance and performing potentially lifesaving cardiopulmonary resuscitation (CPR), including using a defibrillator, until emergency services arrive to take over.

The course is delivered in line with the Australian Resuscitation Council guidelines and applies to all workers or members of the community who may be required to provide CPR in the event of an emergency.

The following unit(s) will be awarded to successful participants in this course. The certificate will be issued by Allens Training Pty Ltd - RTO 90909.

HLTAID001 Provide cardiopulmonary resuscitation

Entry Conditions

Participants must have the physical capacity to perform 2 minutes of uninterrupted CPR on the floor.

Assessment Requirements

Individuals undertaking this course will be expected to complete both written and practical assessment tasks.

Course Delivery
