**PUAFER007 Manage an Emergency Control Organisation**

**Unit being delivered**

An ECO's priority is the safety of facility occupants and visitors during an emergency which means ECO members are responsible for pre-emergency, emergency and post emergency actions. Careful planning, training and initiation must take place for this to happen safely and effectively. This is done by an Emergency Planning Committee.

If you are a member of an Emergency Planning Committee, then this course is a must for you.

It covers the skills and knowledge required by a member of an Emergency Planning Committee to document and maintain a facility emergency plan, to establish and maintain an emergency control organisation and to operate in accordance with the facility's emergency plan.

It includes initiating emergency response planning, ensuring an emergency control organisation is in place, providing for initiation and control of an initial emergency response, providing for post initial response activities, planning and implementing emergency control training and providing support in the post response and/or recovery phase.

All aspects of this course will be undertaken in accordance with legislative requirements, organisational policies and procedures and accepted safe practices. The course has been developed to cover occupants and facilities as specified in Australian Standard (AS) 3745 and AS4083. Occupants are people attending a facility on a permanent or temporary basis such as an employee, contractor, student or resident, but not a visitor or patient and a facility is a building, structure or workplace that is, or may be, occupied by people (occupants).

The following unit(s) will be awarded to successful participants in this course. The certificate will be issued by Allens Training Pty Ltd - RTO 90909.

**PUAFER007 Manage an Emergency Control Organisation**
